

Breslau/Wrocław

Twinned with since 1987

Dr. Rafał Dutkiewicz
President

Our shared history began based on the love of a native of Breslau for his city 25 years ago and I am referring here to the former Mayor Achim Exner, who was born in Breslau and it is thanks to his initiative and great commitment that this twinning came about. Becoming acquainted with both cities began in an age when not everything could take place so easily, two years before the great turning point that both our countries went through, which had such a great impact on our subsequent relationships.

In the course of 25 years of being twinned so many changes have occurred in both our cities; we are especially delighted, however, by the fact that there are always people who wish to maintain and support this collaboration. These civic initiatives please us the most because they prove that the partnership is alive, even though the distance between Breslau and Wiesbaden is difficult and demanding.

There is certainly still much to do in the context of our joint projects, but this gives us hope for our collaboration in years to come, and that we will not rest on our laurels. These 25 years now form a basis for the future years of our cooperation.
