

# Glarus

Twinned with Biebrich since 1990

**Christian Marti**  
President

Town twinning is a very significant way to network internationally, to exchange views in all kinds of situations and to learn from each other. Glarus deliberately focuses on a varied, strong connection in being twinned with Wiesbaden-Biebrich. Our twinning relationship has grown over the decades. In addition to the official contacts of politicians and administrators there is also a lively exchange between various stakeholders in civil society, including schools, churches, associations and numerous individuals.

We consider our twinning with Wiesbaden-Biebrich to be very significant. It is important for us to be able to continue and develop our existing contacts in order to maintain the friendships we have established. In future we want to work on even broader support for relations across all social levels. We place particular emphasis on exchanges between children and young people, which have developed very positively in the last five years.
